

DD/S&T 1658-68

19 April 1968

MEMORANDUM FOR: See Distribution

- 25X1A 1. A small solid-state chip capable of radiating at S or C band at an average power output of approximately one watt has been developed by [REDACTED]. Consideration is being given by other government agencies to use this device as an expendable jammer. Other possible applications which may be of interest to your office may be readily envisioned.
- 25X1A
25X1A 2. [REDACTED] representative, will arrange for the [REDACTED] expert on these devices to discuss them in some detail on Friday, 26 April at 10 AM in the DD/S&T Conference Room.
- 25X1A 3. If there are members of your office who would like to attend, please inform [REDACTED] extension 7655.

25X1A

[REDACTED]
Special Assistant to the R&D Coordinator
